

# FLEXIPOND SYSTEMS

MPC Kinetic has developed patented FlexiPond technology to assist with above ground oil field fluid management, significantly reducing excavation costs.

## SEE IT:

MPC Kinetic identified operations in remote locations were spending unnecessarily on trucking costs for water management.

## SOLVE IT:

MPC Kinetic developed an above ground fluid management system that reduced the need for dam excavation and allows for treatment and ultimate disposal.

## DO IT:

This innovative solution has seen more than 500 FlexiPonds installed across the country, resulting in more than 1 billion litres of water being safely stored and eliminating 2 million tonnes of excavation work.
